Sub : Need for E-learning Facility in Schools

Dear Sir/ Madam,

We have come to know that Rotary India Literacy Mission installs E-learning facility in the schools which comprises of a digital projector and software in the local language and as per our State Board curriculum.

At present the schools (as per the list attached) do not have this facility and would be grateful if the facility is installed in the schools to enrich the quality of teaching and learning.

Respective School Authorities would ensure the following:

- Training is taken by two teachers on the operation of the E-learning facility
- Proper Maintenance of Projector
- Security arrangements for the Equipment
- The school is ready to bear the additional electricity cost of running the e-learning equipment
- Regular usage report
- Facilitation of the visit on behalf of Rotary India Literacy Mission for Monitoring and Evaluation

Kindly let us know in case there is any other documentation requirement.

Regards,
